TECE

POINT OF INTEREST

Let's face it, a toilet flush plate is not designed to be the centre of attention. But why not, when it can offer so much for hand and eye with perfect lines and surprising materials? Just like TECESquare.

The straightest TECE flush plate stands out with its precise workmanship, rich feel and flat design. And new surfaces for new bathroom designs.

TECEsquare metal

RUSTED STEEL

03

From a “no-no” to a must have.
Rusty steel creates an exciting contrast
between modernity and transience in
architecture. And has inspired us to create
this new metal surface for TECEsquare.

Industrial culture meets homeliness

Surfaces made of rusted steel add a special touch to the homely ambience of this interior. With TECESquare Rusted steel and its surface of corroded steel pigments, the charm of industrial culture has now also entered the bathroom.

" For individualists looking for something special, we handcraft each TECESquare Rusted steel surface with a unique, everlasting finish. Each one unique."

Thomas Lehner junior
Managing Director Lehner Paint Shop

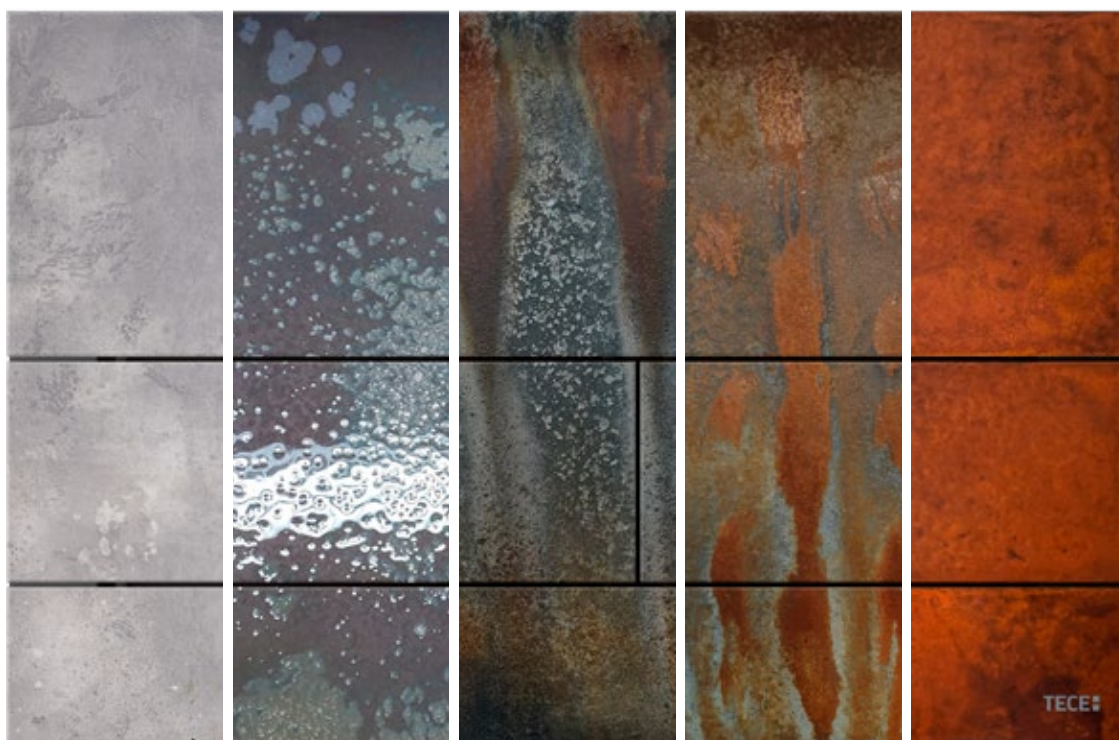

For more than 30 years, the Lehner family has shared a passion for refined metal surfaces in their workshop in Fürstenzell, Germany. Not only in the close circle of father Thomas and mother Ingrid Lehner along with son Thomas junior, but also with the world: Because their numerous customers include not only the construction industry but also hotels, restaurants and yacht builders who like to cater to the exclusive tastes of their international guests and customers down to the smallest detail, not only following trends but also setting them.

NEW LOVE RUSTS

In a manual process, a new design flush plate with an individual rusted look is created piece by piece based on a stable stainless steel flush plate.

A special sealing process makes the rust-pigmented surface stable, resistant and easy to clean.

Quality is non-negotiable. Neither for the Lehner family nor for TECE.

BEAUTIFUL TO THE TOUCH

The TECESquare metal collection: Refined brushed metal surfaces in a variety of colour shades, durable, lively and easy to clean, flattering to the hand and eye. Not quite everyday – for every day.

TECEsquare metal

BRUSHED NICKEL

Here's to new metal tones!
Champagne-coloured and with
a high-quality brushed finish,
TECEsquare Nickel brings a
fresh, elegant accent to light
bathroom ambiances.

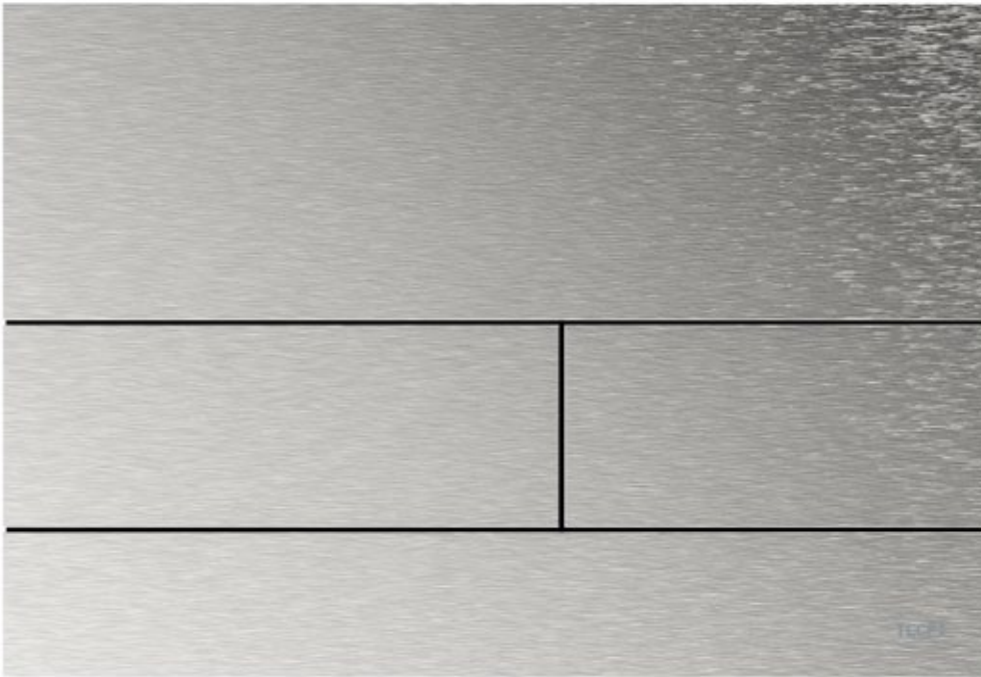

TECEsquare metal

BRUSHED STAINLESS STEEL

Robust, timeless, strong in expression. This is what makes stainless steel a modern classic of everyday design. And TECEsquare brushed stainless steel the undisputed flagship of our TECEsquare metal collection.

TECESquare metal **Brushed red gold**

A homage to the modern feminine style in which reserved elegance and a confident appearance is not a contradiction.

TECESquare metal **Brushed gold optic**

A confident statement that gets a modern look and the necessary touch of understatement from the matt brushed finish.

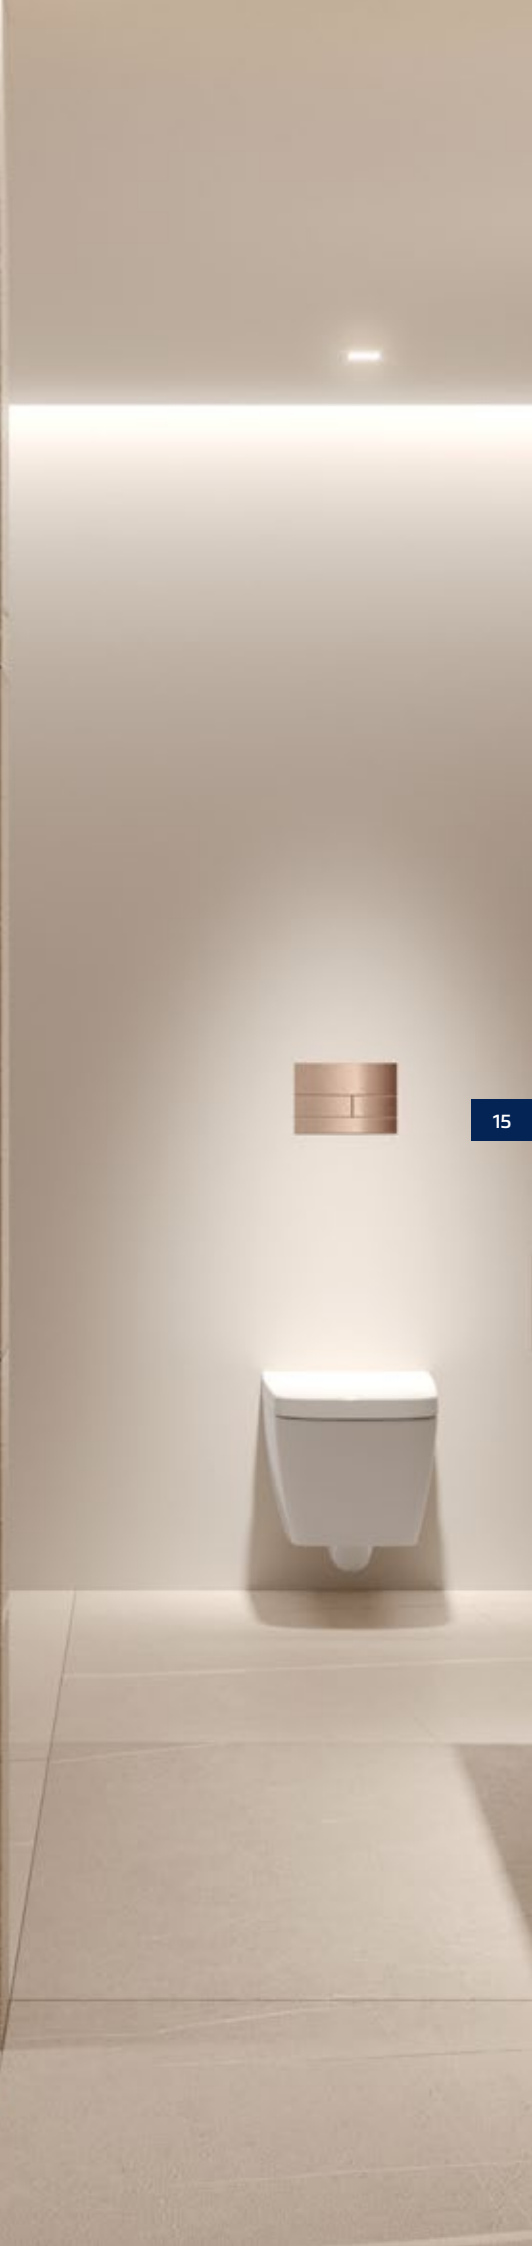

TECESquare metal **Brushed black chrome**

Deep dark and matt: a strong flush plate for dark colour concepts and masculine interiors.

TECESquare metal flush plates feature a high-quality, brushed surface. They are mounted with the aid of a special installation frame that allows for a particularly flat design. TECESquare metal flush plates, for example, are particularly flat in front of the wall at just 3 mm.

TECEsquare metal

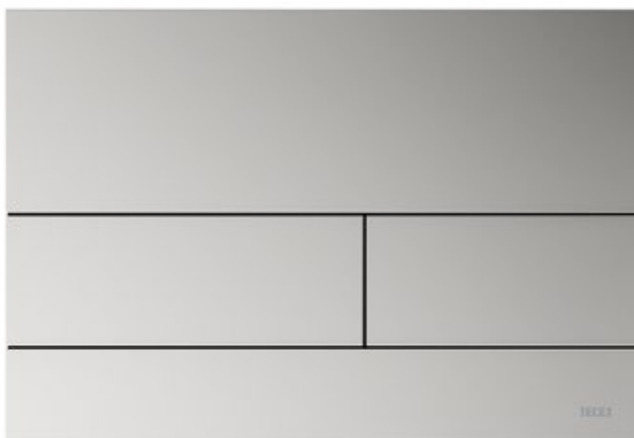

OUR SHINING PIECES

Strong gold look and classic bright chrome.
The high-gloss addition to the TECEsquare metal collection.

TECEsquare metal Polished gold optic

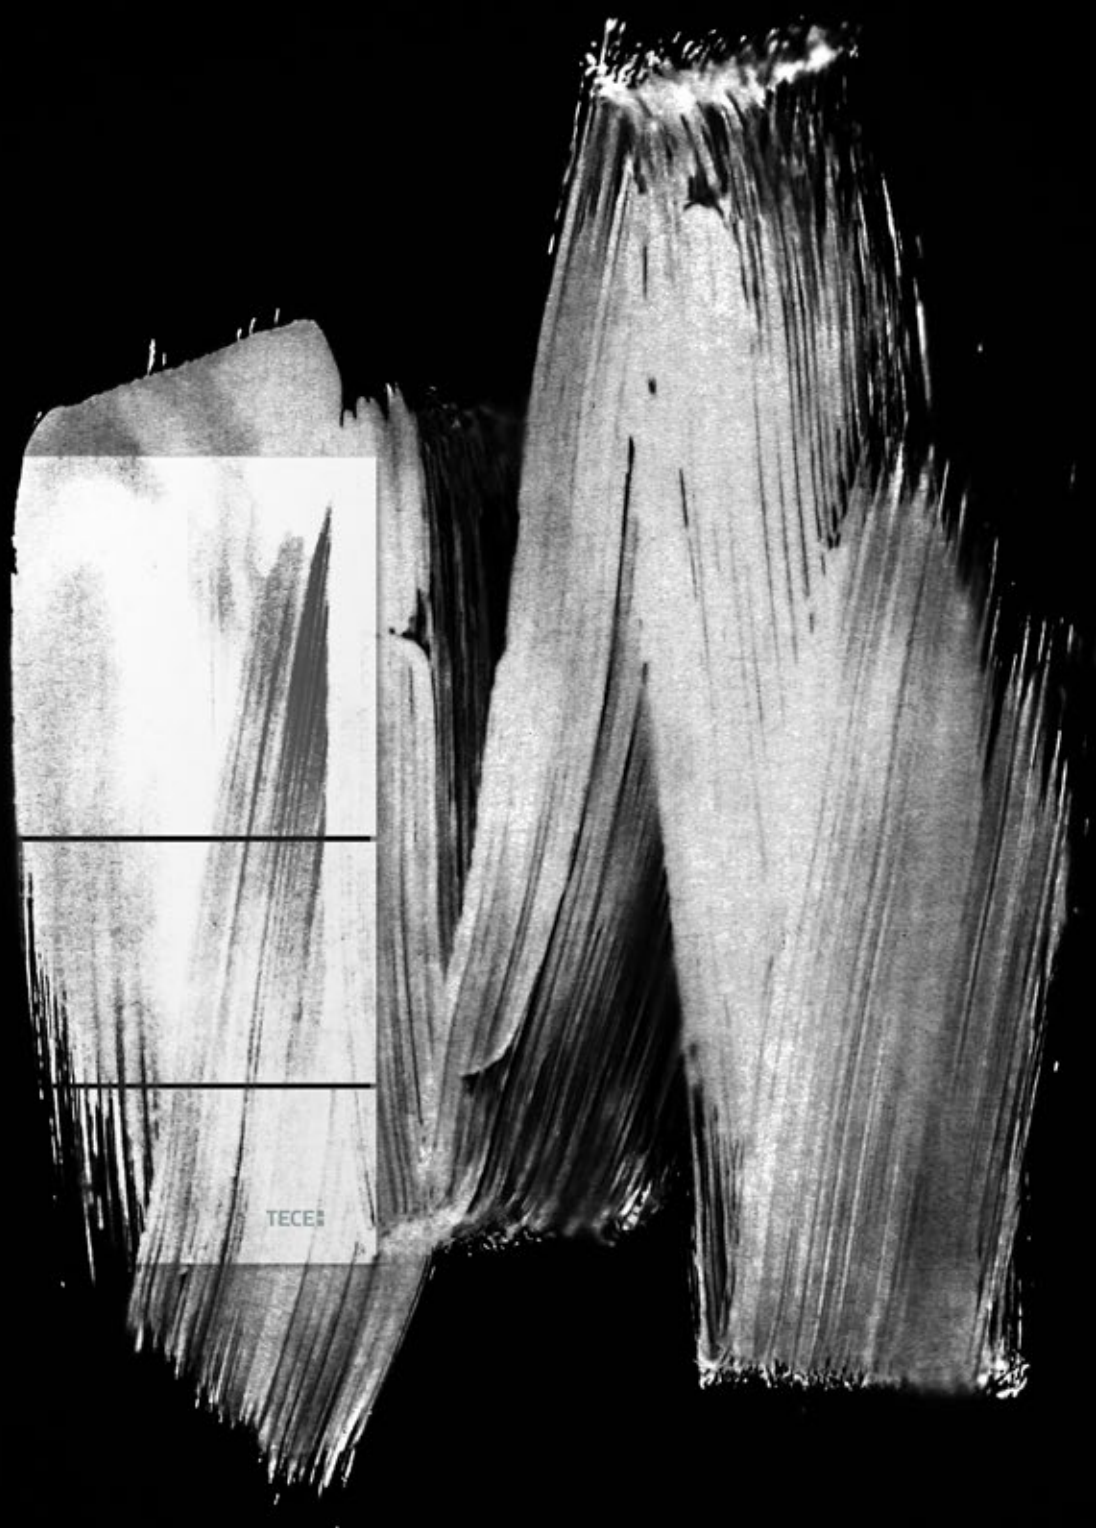

A touch of luxury: Fittings, drainage and TECEsquare toilet flush plate in bright gold optics add warmth and exclusive elegance to the room.

TECEsquare metal Bright chrome

No collection without the classic: TECEsquare bright chrome perfectly matches classic bright chrome fittings and turns the room into a timeless overall composition.

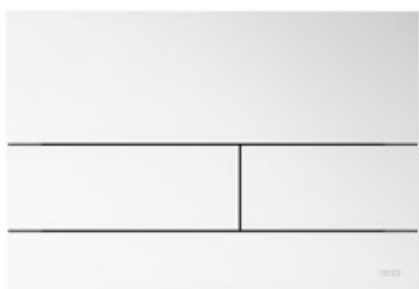

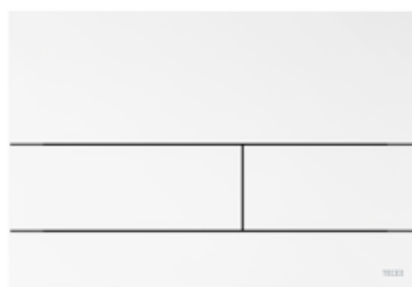

TECEsquare metal

CONTRASTS

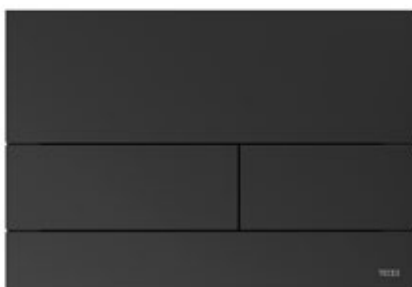

TECEsquare metal
Polished white

TECEsquare metal
Matt white

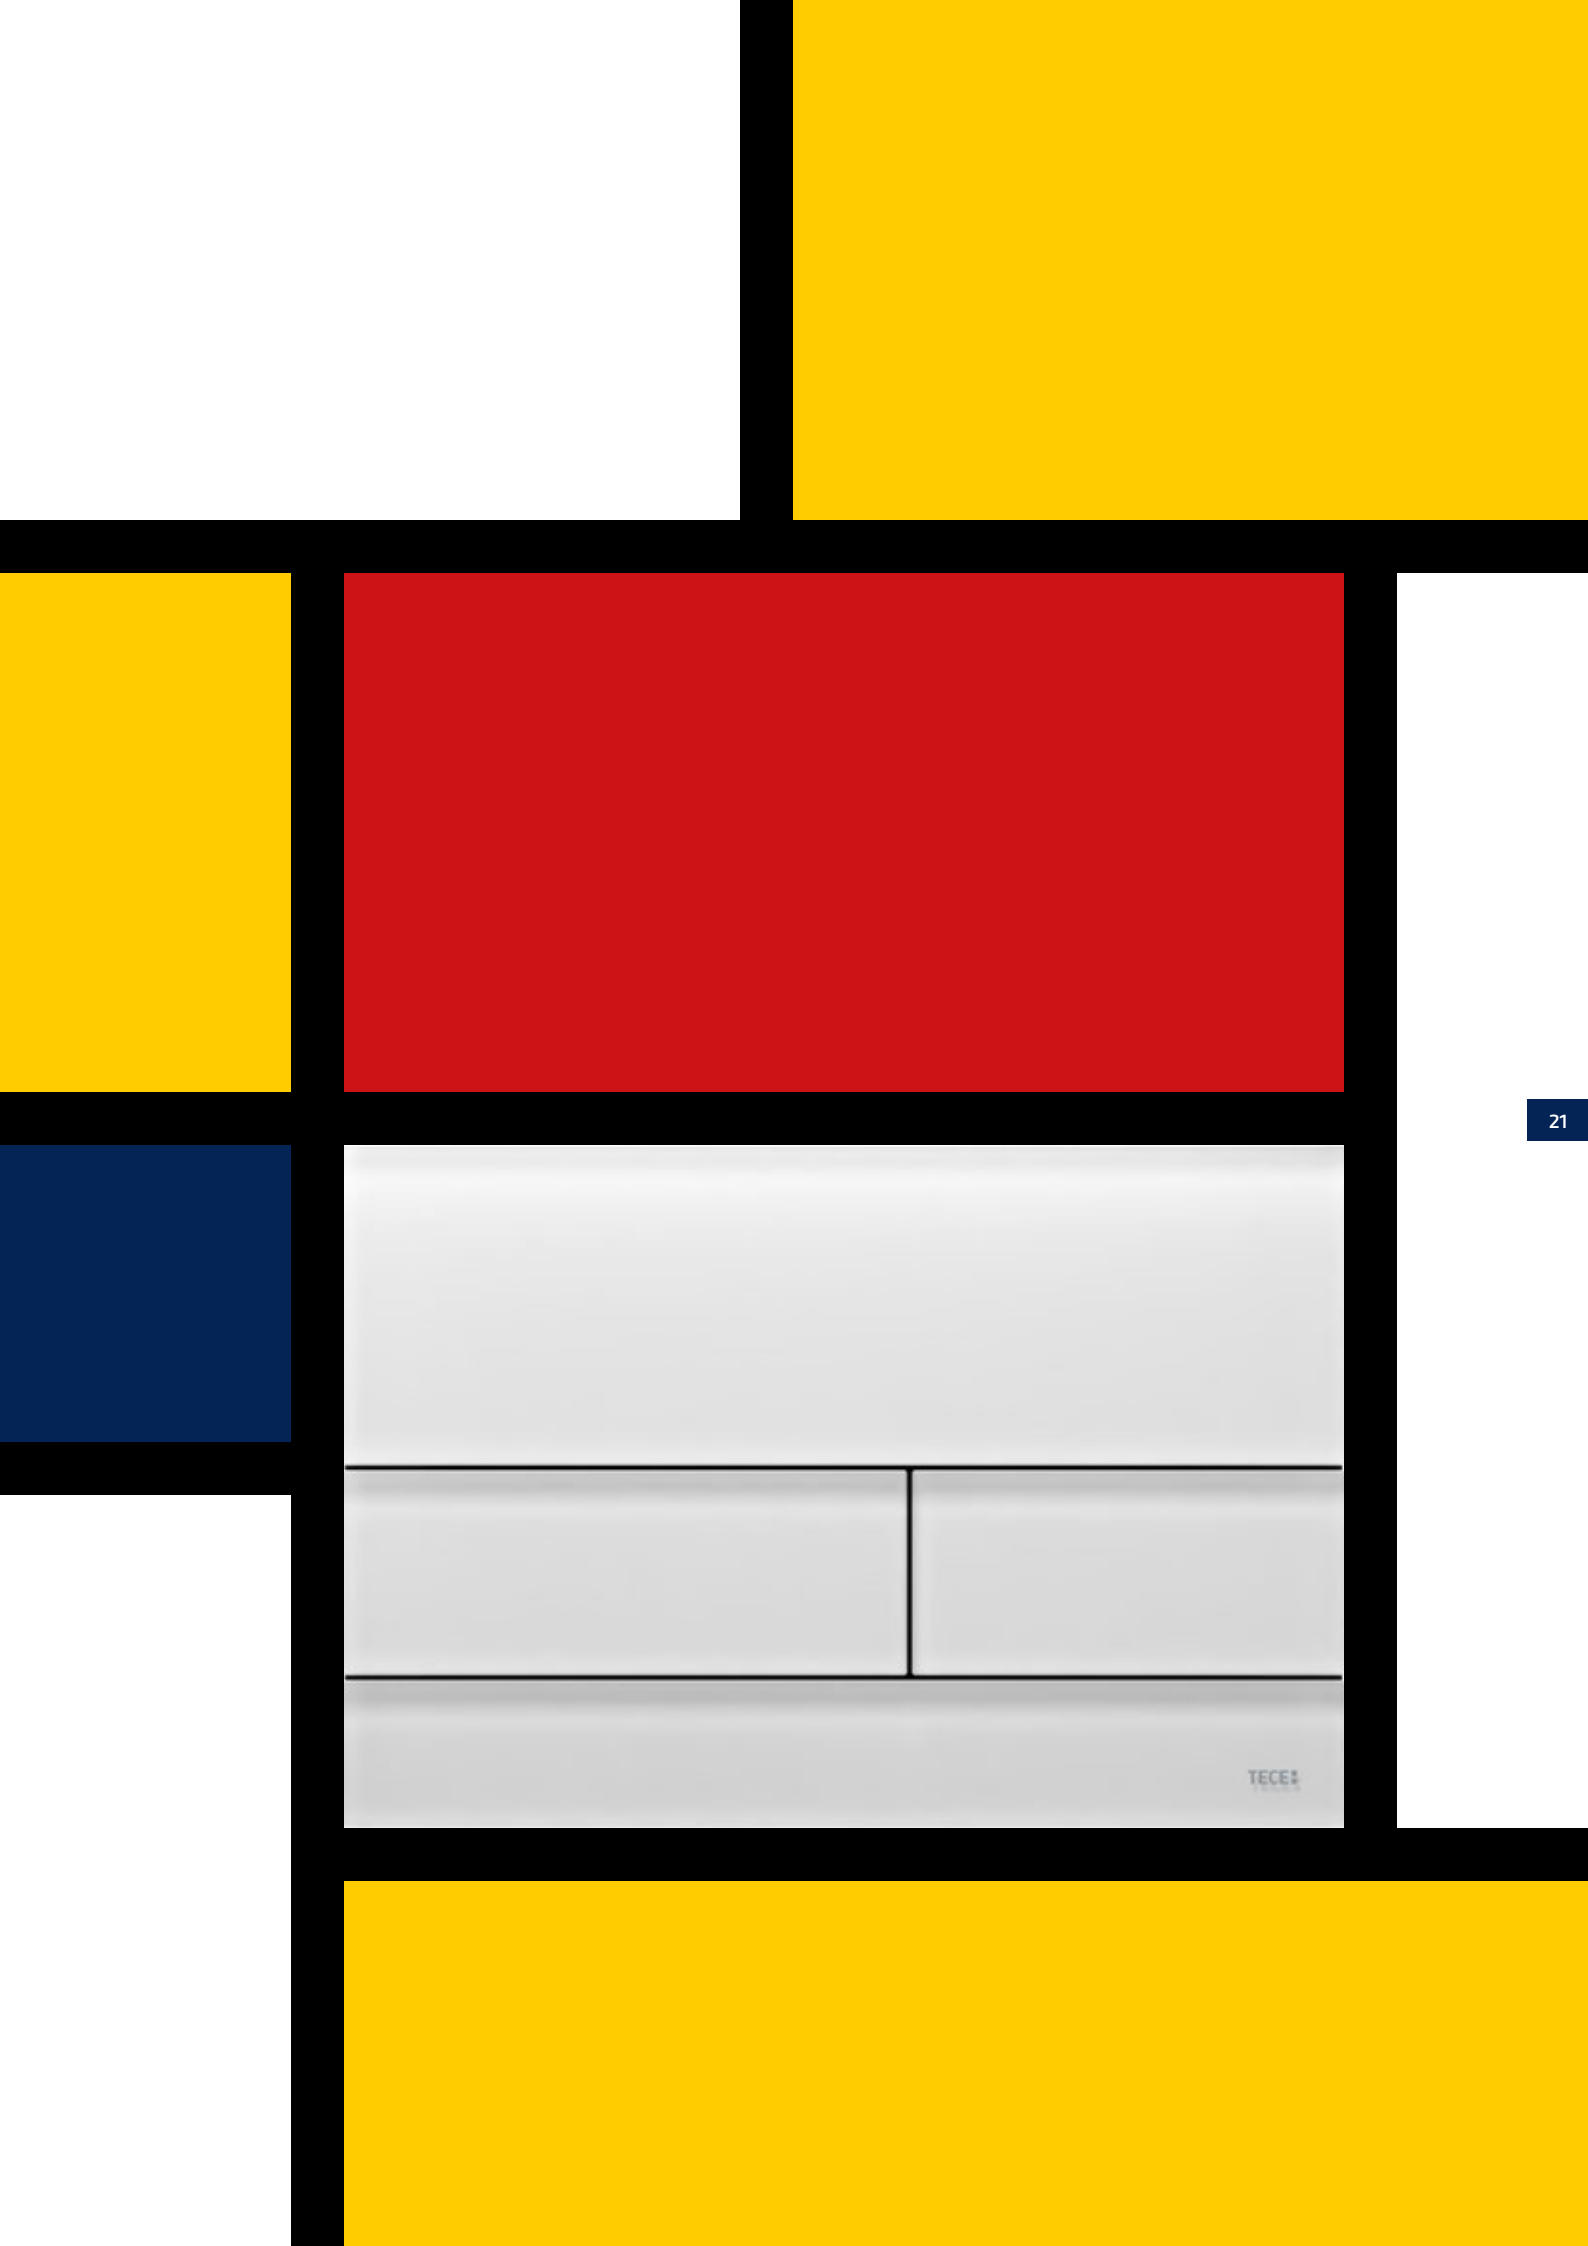

TECEsquare metal
Matt black

When it comes to the game of contrasts, these are our bet: TECEsquare metal flush plates, lacquered to high quality in the non-colours black and white.

INSPIRING

Horizontal and vertical. Adding depth to flatness. The new TECESquare flush plates made of 5 mm thick, precisely cut satin glass turn the toilet flush plate into a work of art.

Joint and colour

Combine to create a contrasting bathroom ambience with fittings, drainage and TECESquare toilet flush plate in the trend colour black.

TECEsquare glass Satined signal grey

Concrete colours, cast in glass.
Signal grey sets warmer or colder accents, depending on the background, thereby becoming a variable player in the design concept.

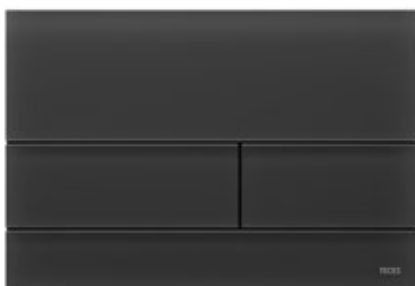

TECEsquare glass Satined sand beige

Warm in tone and impression, the satin-finished plate in sandy beige blends harmoniously into all natural bathroom interiors.

TECEsquare glass Satined white

Whether used neutrally or as a contrast, the white flush plate stands for purity and freshness in the bathroom and toilet.

TECEsquare glass Satined black

A powerfully dark toilet flush plate that adds depth through the satin-finished glass.

A reference to room architecture. Horizontal and vertical lines of the glass construction are reflected in the TECEsquare toilet flush plate.

TECEsquare METAL

High quality metal surfaces. Brushed, polished or lacquered. In contemporary colours to match current bathroom trends. In a timeless, clear design. This is the TECEsquare metal collection.
